***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 19 and 23 are rejected under 35 U.S.C. 102(e) as being anticipated by Yamane et al.

Yamane et al discloses a recording/reproducing apparatus that shows all the limitations recited in claims 19, and 23, including the feature of pre-encoding the video data using motion vector detected by the detecting means (See Yamane et al's Figure 2, component 1, and Figure 4, component 101), and the feature of encoding the video data using the motion vector detected by the detecting means and the information generated in the pre-encoding means as specified in the present claims 19, and 23. (See Yamane et al's Figure 2, component 3).

3. Claims 20-22, and 24-26, are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
